Re: WWGB (AM), Indian Head, Maryland  
Facility Identification Number: 71245  
Good Body Media, LLC  
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed January 4, 2010, on behalf of Good Body Media, LLC ("GBM"). GBM requests extension of the special temporary authority ("STA") granted on October 7, 2009, to operate Station WWGB with parameters at variance and/or reduced power while maintaining monitor points within licensed limits, and with a nondirectional antenna and reduced power.<sup>1</sup> In support of the request, GBM states that it has completed repairs to the station's facilities; however, adverse weather conditions have delayed completion of partial proof of performance measurements.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made progress toward restoration of licensed operation, but additional time is required for completing the work. Thus, extension of STA is warranted.

---

<sup>1</sup> WWGB is licensed for operation on 1030 kHz with 50 kilowatts, daytime hours only, employing a directional antenna (DA-D-D).

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WWGB may continue to operate with parameters at variance and/or reduced power while maintaining monitor points within licensed limits. Operation with a temporary nondirectional antenna and reduced power not to exceed 12.5 kilowatts also is authorized, only as necessary to facilitate the repair work. It will be necessary to further reduce power or cease operation if complaints of interference are received. GBM must notify the Commission when licensed operation is restored.<sup>2</sup> GBM must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **August 3, 2010**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.

Charles N. Miller, Engineer  
Audio Division  
Media Bureau
